## Mt SYDNEY VTEM SURVEY CONTRACTED

- Geotech Airborne Pty Ltd has been formally contracted to complete a VTEMmax survey at Tando's Mt Sydney Project located in the Pilbara.
- Airborne survey is scheduled to commence in late November.
- Survey will commence at a similar time to the maiden drilling programme by Rumble Resources at the adjacent Braeside Project.
- Rumble Resources completed a VTEMmax survey at Braeside earlier in 2017 which detected multiple conductors associated with regional base metal trends <sup>1</sup>.
- These structural trends continue into the Mt Sydney Project.

<sup>1</sup> Refer ASX.RTR Announcement 4 September 2017

Tando Resources Limited (**Tando** or **the Company**) is pleased to advise that it has now formally contracted Geotech Australia Pty Ltd to complete a VTEMmax airborne electromagnetic (**AEM**) survey across its Mt Sydney Project in the East Pilbara.

VTEMmax is one of the highest resolution and signal-to-noise ratio AEM systems and is a proven exploration tool in discovering large scale base metal deposits.

The VTEMmax system was used by Rumble Resources (**Rumble**) to complete a survey at the adjacent Braeside Project in early 2017. The VTEM survey highlighted a multitude of conductors associated with the identified regional base metal trends. Rumble commented in its ASX Announcement of 4 September 2017:

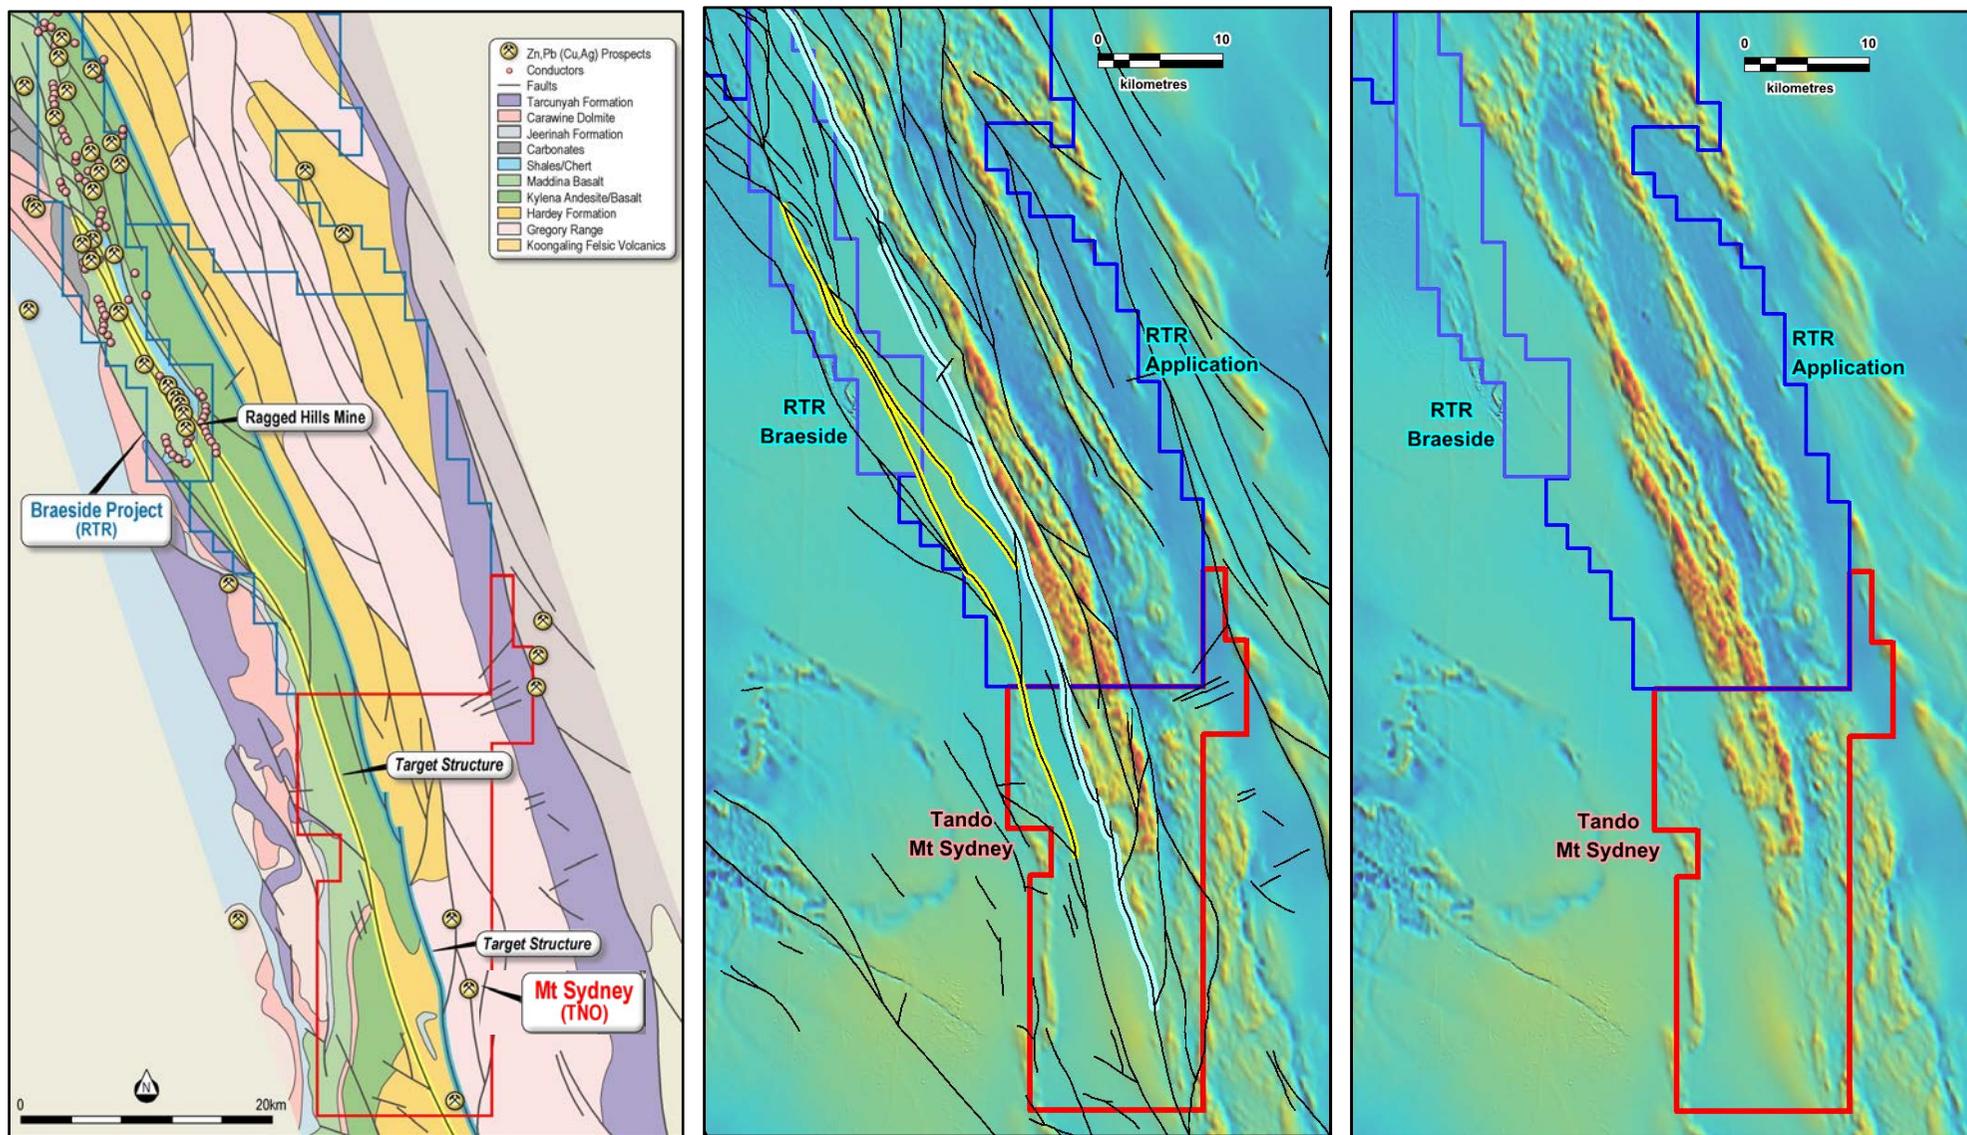

*"Based on the earlier litho-geochemistry work completed by Rumble which identified the VMS potential of the project, the newly defined conductors represent first order VMS targets".*

The Mt Sydney Project lies immediately south of the Braeside Project, with the same structures and lithologies which host mineralisation at the Braeside Project extend into the Company's Mt Sydney Project. Figure 1 shows the location of the Mt Sydney and Braeside Projects over the regional scale bedrock geology interpretation and open file aeromagnetic data (both sourced from the Geological Survey of WA).

The survey is now scheduled to commence in late November, following completion of another survey, which is around the time that Rumble intends to commence its maiden drill programme at Braeside (refer ASX.RTR Announcement 30 October 2017).

The Company will provide a further update once Geotech mobilise to site.

**Competent Persons Statement**

The information in this announcement that relates to Exploration Results complies with the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (**JORC Code**) and has been compiled and assessed under the supervision of Mr Bill Oliver, the Managing Director of Tando Resources Ltd. Mr Oliver is a Member of the Australasian Institute of Mining and Metallurgy and the Australasian Institute of Geoscientists. He has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the JORC Code. Mr Oliver consents to the inclusion in this announcement of the matters based on his information in the form and context in which it appears.
