

ASX RELEASE | 28 APRIL 2023

## QUARTERLY ACTIVITIES REPORT FOR PERIOD ENDED 31 MARCH 2023

Vanadium Resources Limited (**the Company**) (ASX: VR8, DAX: TR3) is pleased to release its activities and cashflow reports for the three months ended 31 March 2023.

### HIGHLIGHTS

- ◆ **Appointment of General Manager Operations, Mr Alex Oehmen, to drive development of the Steelpoortdrift Vanadium Project (the Project)**
- ◆ **Project development work streams continued with a focus on progressing environmental authorisations and water approvals, internal review / optimisation of process flowsheets for the concentration plant and salt roast leach (SRL) plant, and early-stage planning of critical path items for the development of the Project**
- ◆ **Power solutions for the SRL site developing well as Kadoma progresses with plans to develop a utility scale photo voltaic (PV) solar plant next to the site**
- ◆ **Discussions with potential financing, strategic equity investors and offtake parties continued through the quarter, with several non-binding indicative term sheets and expressions of interest having been received**

### STEELPOORTDRIFT VANADIUM PROJECT

Following the completion of the DFS<sup>1</sup> last quarter, the Company has continued to focus on project development activities for the Steelpoortdrift Vanadium Project.

A key step forward for the company was the appointment of highly experienced executive Mr Alex Oehmen as General Manager Operations<sup>2</sup>. Mr Oehmen has over 40 years' industry experience across the resources, mineral processing and engineering sectors, with a demonstrated track record in the management of vanadium and steel making operations within the Bushveld region of South Africa. Mr Oehmen's appointment places the Company in an ideal position to advance Steelpoortdrift through the upcoming stages of preparation for final investment decision (**FID**), construction, commissioning, production and marketing.

Since completion of the DFS, the Company has continued to progress relevant environmental authorisations and water permitting processes for both the Mine and Concentrator and SRL sites. Similarly, the Company has continued to develop and refine the Social Labour Plan with a view to meeting relevant regulatory obligations during the second half of this year.

<sup>1</sup> Refer to ASX Announcement dated 4 October 2022 "DFS Delivers A\$1.9BN NPV Confirming World Class Steelpoortdrift Vanadium Project"

<sup>2</sup> Refer to ASX Announcement dated 20 February 2023 "Vanadium Resources appoints General Manager Operations"

The Company commenced an internal review and optimisation of the process flowsheets, equipment selection and designs for the concentration plant (**Concentrator**) and SRL plant with the aim of improving efficiency and simplifying the operations to ensure that the operation will be able to continue to achieve targeted vanadium pentoxide specifications and production capacity. Upon completion of this optimisation process, the Company plans to proceed to front-end engineering design (**FEED**) to ensure the Project is construction ready, subject to financing deliverables. The key deliverables of the FEED work will include detailed engineering, cost estimation, schedule optimisation, development of Project Execution and Operational Readiness Plans, and tenders for long lead equipment items.

The Company has sought proposals to prepare a pre-feasibility study for the design and development of an overland rope conveyor system to transport concentrate from the Mine and Concentrator site to the SRL site for downstream processing (the **Rope Conveyor PFS**). The rope conveyor has the potential to provide a shorter and more direct transport route, be more energy efficient, operate at a high availability factor and reduce operating costs. A similar rope conveyor system is currently being built by a nearby producer, immediately adjacent to the SRL site. The DFS for the Project has assumed road haulage and has formed the base case for debt financing and valuation purposes. However, the implementation of the proposed rope conveyor will largely be dependent on the findings from the Rope Conveyor PFS with respect to total capex, operating cost, economics, ability of the Company to secure additional funding and timing to secure relevant environmental approvals for implementation.

As flagged in the DFS released in October 2022, Kadoma Investments (Pty) Limited (**Kadoma**) own the adjacent property to the SRL site and were planning to build a utility scale photo voltaic (**PV**) solar plant to provide green energy to the surrounding mines and the SRL site. Kadoma has continued to advance the proposed PV solar plant project which included the development of relevant engineering designs, costings, and potential commercial structures for the supply of power to VR8.

## **CORPORATE**

### **Funding and Offtake Processes**

During the quarter, the Company continued to advance relevant funding and offtake processes and has received positive responses from a range of potentially interested groups across the globe.

The company has presented to a range of potential debt financiers including export credit agencies, commercial banks, private equity funds and other non-bank debt financiers. To-date, several non-binding indicative term sheets have been received, with some including equity contributions as well. The Company plans to continue discussions with debt financiers with a view to obtaining credit approved term sheets and then proceed to mandate the lead arrangers.

Similarly, the company has received indicative term sheets and expressions of interest from potential offtake parties and strategic equity investors. The Company plans to evaluate these proposals and

continue to progress discussions with multiple parties with a view to securing an offtake agreement and strategic equity investment. There is no guarantee that these discussions will culminate in a completed transaction.

### **Investor Presentations**

Over the quarter, the Company attended and presented at the following conferences:

- February 2023 – 121 Mining Investment and Mining Indaba, Cape Town, South Africa; and
- March 2023 – Mining Journal Select Conference, London.

The Company has also been actively promoting the Company through introductory calls, webinars and non-deal roadshows with retail, high net worth and institutional investors. VR8 looks forward to continuing to grow its presence and raising awareness of the Project and the wider Vanadium market.

### **Summary of Expenditure for the Quarter**

During the Quarter, a total of \$326,628 was spent on activities related to the exploration and development of the SPD Project, primarily spent on the DFS. The Company did not incur any expenditure for mining production activities during the Quarter.

Payments totaling approximately \$47,655 were made to related parties of the Company with respect to the Quarter, being director and consulting fees (see section 6.1 and 6.2 of the Accompanying 5B).

### **Cash Position**

As at the end of March 2023 quarter, VR8 and its subsidiaries held total cash and cash equivalents of \$742,782.

### **Post Quarter**

Post Quarter, a General Meeting was held on Wednesday 12<sup>th</sup> April at which approval was provided for the Company to issue 18,000,000 Performance Rights to Mr John Ciganek (MD & CEO) under the Employee Securities Incentive Plan (subject to achieving defined milestones).

Notes:

- Stated at a cut-off grade of 0.45% V<sub>2</sub>O<sub>5</sub>;
- The Mineral Resources are stated on a 100% attributable basis for VanRes, of which VR8 owns 73.95%;
- The Mineral Resources are inclusive of Ore Reserves; and
- Reported in-situ with any apparent computational errors due to rounding not considered significant.

## APPENDIX 2 – ORE RESERVE

The updated Ore Reserve statement as at 30 September 2022 (Table 3).

Notes:

- The Ore Reserves are stated at a price of USD9.50/lb;
- The Ore Reserves are stated on a 100% attributable basis for VanRes, of which VR8 is owns 73.95%;
- The LoM was restricted to a production forecast of 25 years whereafter the mining licence will need to be renewed.
- The Ore Reserves are reported at the point of delivery for processing;
- The Quantity is reported in metric tonnes and the Grade reported as a percentage of contained V<sub>2</sub>O<sub>5</sub>;
- Any apparent computational errors due to rounding are not considered significant;
- The Ore Reserves may be subject to legal, political, environmental or other risks;
- Losses that could occur as a result of transportation of content or Flake are considered to be negligible; and
- 39% of the Ore Reserves are in the Proved category and no Inferred Mineral Resources included in the Ore Reserve estimate.

### Competent Person's Statement and Compliance Statements

The information in the referenced announcements 1 to 3 footnoted below that relates to Exploration Results, including the Mineral Resources contained within the Production Target (and forecast financial information derived from the production targets) at the Steelpoortdrift project has previously been released to the ASX. The Company confirms that it is not aware of any information or data that materially affects the information included in the market announcement, and that all material assumptions and technical parameters underpinning the announcement continue to apply. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcements.

#### Mineral Resources

The Company confirms it is not aware of any new information or data that materially affects the information included in the 4 October 2022 (*VR8 updated mineral resource and ore reserve for the Steelpoortdrift Vanadium Project*) Vanadium Resource estimate and all material assumptions and technical parameters underpinning the estimate continue to apply and have not materially changed when referring to its resource announcement made on 04 October 2022. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcements.

#### Ore Reserves

The Company confirms that it is not aware of any new information or data that materially affects the information included in the Ore Reserves Statement and that all material assumptions and technical parameters underpinning the estimates in the Ore Reserves Statement continue to apply and have not materially changed. The Information that has been presented in this report has been extracted from the announcement dated 4 October 2022 (*VR8 updated mineral resource and ore reserve for the Steelpoortdrift Vanadium Project*). The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcements.
